## Information about Copyrighted Content

Some instruments administered for studies archived with ICPSR may contain in whole or substantially in part contents from copyrighted instruments. Reproductions of the instruments are provided as documentation for the analysis of the data associated with this collection. Restrictions on "fair use" apply to all copyrighted content. More information about the reproduction of copyrighted works by educators and librarians is available from the United States Copyright Office.

### NOTICE

#### WARNING CONCERNING COPYRIGHT RESTRICTIONS

The copyright law of the United States (Title 17, United States Code) governs the making of photocopies or other reproductions of copyrighted material. Under certain conditions specified in the law, libraries and archives are authorized to furnish a photocopy or other reproduction. One of these specified conditions is that the photocopy or reproduction is not to be "used for any purpose other than private study, scholarship, or research." If a user makes a request for, or later uses, a photocopy or reproduction for purposes in excess of "fair use," that user may be liable for copyright infringement.

**Note:** The full screener questionnaire is available as a separate document. These items reflect just those in the data set.

Now we just need to verify your age to see whether you qualify for the study.

1. What month and year were you born?

Month\_preload      Month: \_\_

Year\_preload        Year: \_\_\_\_

**Text 5:** Great, we're glad you qualify!

I want to assure you that everything you tell me will be held confidentially to the highest level possible.

We just have some questions to ask you so we can determine how you can help us in the study.

**sc008**              What is your gender? [appears as 'gender' variable in survey data]

- 1          Male
- 2          Female

**sc009**              Do you have access to the internet in your home?

### C. NETWORK: NAME DESCRIPTIONS

*Note: By this point, the software has compiled a list of unique names from section A (spouse/partner; members of household) and Section B. It has checked to make sure each name is unique. There is a record line for each name and a variable indicating the specific question(s) which elicited it (and the rank order of its elicitation for each question that elicited it). The questions in Sections C and D provide further variables for each Name record. Those with no names mentioned skip to Section D.*

**The C variables can be found in the Names file only.**

In wave 2, the instrument matches all names listed by the respondent against the list imported from wave 1 and asks questions about names that were not re-listed in wave 2. In wave 3, the instrument does the same thing with regard to wave 2 names, but in addition looks back to wave 1 and asks about alters who were named in wave 1, not named in wave 2, and then re-listed in wave 3. Wave 3 also asks why any totally new alters were listed (if they were indeed totally new). Please check the codebook

carefully, as the variable names for these name-checking variables are different in the codebook and questionnaire as they are not technically questionnaire items.
