ICPSR PROCESSING NOTES FOR #36975
UC Berkeley Social Networks Study (UCNets), San Francisco Bay Area, 2015-2018
DS 5: Ego Wave 1 Data

1. **Confidentiality/Disclosure Risk:** In order to protect respondent anonymity and prevent disclosure risk, ICPSR performed the following curation steps:

    a. All open-ended string responses have been masked.

    b. The variables **BEGINTIME_NUMERIC, BEGINTIME,** and **ENDTIME** have been recoded.

2. **Variable Link:** The variable **PRIM_KEY** is the linking variable across the datasets.

3. **Additional Information:** For additional information on the New Family Structures Study, please visit the UCNets website.

Variable Description and Frequencies

Note: Frequencies displayed for the variables are not weighted. They are purely descriptive and may not be representative of the study population. Please review any sampling or weighting information available with the study.

Summary statistics (minimum, maximum, arithmetic mean, median, mode, and standard deviation) may not be available for every variable in the codebook. Conversely, a listing of frequencies in table format may not be present for every variable in the codebook either. However, all variables in the dataset are present and display sufficient information about each variable. These decisions are made intentionally and are at the discretion of the archive producing this codebook.
